SCAN ME

Experience

2020
March to October

Full-Stack Web Developer
Efma
I joined the digital team of Efma as a full-stack developer. Our mission was to modernize, page by page, the efma website (front & back end) ; integrate new functionalities and develop an instant messaging web application from scratch, dedicated to efma clients. This experience at Efma significantly strengthen my technical skills.

2019 - 2020

Freelance Full-Stack Web Developer
Hyona Studio - Freelance
I started freelancing during my studies, with the aim of learning from experience and developing my ideas and creativity.
I developed websites, setting up and manage e-commerce platforms and created graphic works for my clients. I also did project management and IT support at home.

2017 - 2019

Web Developer & IT Manager
YMX Digital / Allegro Software
After obtaining the CESS, I was hired at YMX Digital / Allegro Software as a full-stack web developer.
My role was to develop projects, listen and understand client needs and also organize and follow the development and the development team.
